Structure of an HTML Document

1. Create a basic HTML document with:

   - A title "My First Webpage".

   - A heading that says "Welcome to My Page".

   - A paragraph introducing yourself.

2. Add a comment in the code that explains the purpose of each section.

Basic HTML Elements

3. Add the following elements to your webpage:

   - A main heading `<h1>` and a subheading `<h2>`.

   - A paragraph with some placeholder text.

   - A horizontal line `<hr>` after the paragraph.

   - A line break `<br>` between two sentences.

4. Use the `<strong>` and `<em>` tags inside your paragraph to highlight important words.

Lists

5. Create an **unordered list** of your favorite hobbies.

6. Create an **ordered list** of the steps to make a cup of tea.

7. Create a **nested list**:

   - List your favorite foods.

   - Under each food, add two drinks that go well with it.

Adding Links, Images, and Buttons

8. Add a hyperlink that opens "https://www.google.com" in a new tab.

9. Insert an image with the following details:

   - Image URL: `https://via.placeholder.com/150`

- Alternative text: "Placeholder Image".

10. Create a button labeled "Click Me!" that, when clicked, redirects to "https://www.example.com".
